From the Office of Dr. Ninh Tran, Medical Officer of Health, Southwestern Public Health

Prevnar 20 Storage Requirements

Please be advised of storage requirements for Prevnar 20. During storage, a white deposit and clear supernatant may be observed in the pre-filled syringe.

Syringes should be stored horizontally as noted on the vaccine box to minimize the re-dispersion time, as per the illustration below:

IMPORTANT:

- **Do not use the vaccine if it cannot be re-suspended.**
- **Do not use the vaccine if large particulate matter or discoloration is found.**

Refer to the product monograph for more information about Prevnar 20 storage, handling, and administration.

If you have general questions about vaccine storage, call 1-800-922-0096 to reach the Southwestern Public Health Vaccine Branch.
