

Bad cough that won't go away?

**It could be whooping cough
and it can make babies very sick.**

- A cough that gets worse over time or lasts for weeks
- Coughing fits with a "whoop" sound or with vomiting
- Adults and children can pass it on to babies
- Pregnant women can also pass it on to their babies
- Babies may not eat well, may be more tired, or lips may turn blue
- Babies can be hospitalized or die

How to Protect Your Family

- ✓ Stay home when sick
- ✓ Get vaccinated
- ✓ Clean your hands often
- ✓ Speak to a doctor about antibiotics for a long-lasting cough
